ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD AND SYSTEM FOR AUTHENTICATION OF A SERVICE REQUEST

(57) Abstract: The invention concerns a method and a system for authentication of a commission from a customer (41) to a service provider (42), according to which a set of randomly generated code words has been stored in a memory circuit associated with a mobile-telephone subscription in a mobile telephone (10) as well as in a database (21) together with an association to said mobile-telephone subscription. The method comprises the steps of determining the identity (43) of the customer, of identifying the mobile-telephone subscription on the basis of the identity of the customer, of retrieving a code word (46) from the memory circuit, and of checking the presence of said code word in the code word set in the database (21) that is associated with said mobile-telephone subscription, in order to thus authenticate the commission.
